Dear Julian

Re: Modification Proposal 0132: 'Clarification of Supply Point Confirmation Notice Requirements for Certain Special Metering Supply Points'

Thank you for providing SGN with the opportunity to comment on the above modification proposal.

I can confirm that SGN supports the proposal.

The existing wording of section G2.5.8(c) requires a two month notice period for all Supply Point Confirmations. This minimum notice period requirement conflicts with the equivalent notice period requirements detailed elsewhere within section G2.5.8. It has become apparent that the two month requirement is only applicable if the relevant Supply Point is going to be removed from or added to the sites and meter database (UK Link).

Administration 'offline' is required due to the specific characteristics and requirements of 'Unique Sites' (termed Special Metering Supply Points) and would require a two month notice period to be submitted; this would allow adequate time to carry out any relevant transactions

SGN notes that this proposal could be implemented with minimal or no system costs and only minor changes to the internal processes and procedures, we assume this is also the case for operational costs.

We hope you find these comments helpful.

Yours sincerely
