Modification Proposal 134: Publication of Nodal NTS Demand Forecasts

Dear Julian,

RWE npower supports the above modification proposal.

Having previously supported National Grid's proposal to change the methodology for calculating NTS Capacity charges we accept that it is necessary to allow publication of the nodal demand forecast data used in the new charging model, in order to give it effect.

Restricting publication of this information to three Gas Years hence is a sensible measure to avoid any User concerns about commercial sensitivity, and broadly aligns with the default lead time for National Grid to build new NTS Capacity.

Yours sincerely,

Steve Rose
Economic Regulation
