Dear Julian,

RE: Modification Proposal 0153: Amendment of Interconnector UK's Network Entry Provisions

Thank you for the opportunity to comment on this proposal.

British Gas Trading (BGT) is in support. That said, we would appreciate some more information on the scope of the planned upgrade, in particular to understand what work is being undertaken to increase the metering range.

We would also wish to understand little more on the change of the measurement standard from ISO 5167-1:1991 to ISO 5167:2003. We understand that changing from the 1991 version to the 2003 version can have material effect on the delivery, unless DTI guidelines on its implementation are precisely followed. Within scope of such an upgrade should be changes to the metering hardware and the software in the flow computers.

Should you have any queries with regard to this response please do not hesitate to contact me.

Yours sincerely,

Chris Wright
Commercial Manager
