Re: UNC 0156 and 0156A

Dear Mr Majdanski,

Teesside Gas Processing Plant (TGPP) is one of two gas processing facilities that process gas landing at Teesside via the Central Area Transmission System. As such we maintain an interest in the efficient operation of the UK Entry Capacity regime.

TGPP supports both proposed modifications number 0156 and 0156A but with a preference for 0156A.

However, we only support these modifications on the basis that they are a short term measure to improve the situation for this winter. We believe that further work and consultation should be undertaken to examine various aspects of Transfer and Trade and Substitution before a long term solution is finalised.

Yours sincerely,

Andy Heppel
Chief Executive Officer
Teesside Gas Processing Plant Limited
