

Variation Request

Modification 0165: “Change to Measurement Provisions Change Process”

Date: 03/10/2007

The Proposer, National Grid NTS, requests a variation to this Proposal, pursuant to UNC Modification Rules Section 6.5.1(c) of the UNC.

Reason for Variation

A number of minor changes to the Proposal and a restructuring of the legal text have been proposed.

Nature of Variation

- Remove the requirement for Site Operator to be a new UNC defined term throughout the Proposal. During drafting of the legal text it was considered that this aspect of the Proposal was not necessary and may add unnecessary complexity.
- The last sentence of the fourth paragraph of section 1a to be amended to “Where *one or more relevant* Users...”. This clarifies which Users can reject the proposed changes to the agreement.
- Amendment to the legal text to remove references to Condition A11(18) Approval and to harmonise the mechanics of the relevant paragraphs within Sections I & J. Again, during legal text development it was identified that Condition A11(18) (recourse to the Authority) is replaced by the processes described in the Proposal (recourse to the Modification Process) and is therefore no longer required.
