Dear Julian,

RE: Modification Proposal 0165V: "Change to measurement provisions change process"

Thank you for the opportunity to comment on this proposal. British Gas Trading supports its implementation.

Our only minor concern in respect of this proposal is that the wider community may lose sight of the fact that the arrangements at specific entry points are being changed to provide greater throughput, whereas under existing provisions, the raising of a UNC modification proposal generally provides adequate publicity.

That said, overall we support this proposal, believing that it aids the efficient administration of the Uniform Network Code.

Should you have any queries with regard to this response please do not hesitate to contact me.

Yours sincerely,

Chris Wright
Commercial Manager
