Our Reference: Mod 165V Response

Dear Julian

Representation in response to Modification Proposal 0165V: “Change to Measurement Provisions Change Process”

Thank you for the opportunity to respond to this Draft Modification Report. As proposer, National Grid NTS supports this proposal.

Basis upon which the Proposer considers that it will better facilitate the relevant objectives specified in Standard Special Condition A11.1 & 2 of the Gas Transporters Licence.

A11.1 (e): so far as is consistent with sub-paragraphs (a) to (d), the provision of reasonable economic incentives for relevant suppliers to secure that the domestic customer supply security standards... are satisfied as respects the availability of gas to their domestic customers

National Grid NTS agrees that the implementation of the proposal will better facilitate this objective by removing potential delays to the process of changing NEAs.

A11.1 (f): so far as is consistent with sub-paragraphs (a) to (e), the promotion of efficiency in the implementation and administration of the network code and/or the uniform network code

National Grid NTS agrees that the implementation of the proposal will better facilitate this objective by reducing the number of non-contentious ‘housekeeping’ modifications for industry parties to consider.

Please do not hesitate to contact me if you require clarity on any aspect of the modification proposal or this response.

Yours sincerely,

Adam Sims
