06 December 2007

Dear Julian,

Modification Proposal: 180V Replacement of file formats contained within Annex A Part 7 of the LDZ CSEP NExA.

Thank you for providing Scotia Gas Networks (SGN) with the opportunity to comment on the above Modification Proposal. SGN fully support implementation of this Proposal.

The current version of the NExA does not contain file formats which reflect those in use by iGTs and DNOs. This Modification Proposal was raised to replace the contents of Annex A Part 7 with new file formats which reflect current practice. File formats pertaining to the CSEP NExA have been widely discussed within the Ofgem facilitated groups looking at issues associated with the CSEP NExA.

This proposal aligns the NExA with current practice and improves overall efficiency. Additional detail is also provided to add clarity, compared to that set out in NExAs currently. SGN believes this proposal would better facilitate the relevant objective A11.1(f) ensuring prompt, accurate and timely transfer of information between DNOs, iGTs, xoserve and Shippers and improving overall efficiency of arrangements.

We hope you find these comments helpful.

Yours sincerely

Bali Dohel
Network Officer
