Dear Tim,

RE: Modification Proposal 0181 (Urgent) - Scheduling Charges Calculation for Gas Flow Days 22, 23, 24, 25 & 26 October 2007

E.ON UK **supports** implementation of this Proposal. We believe the proposal represents a pragmatic solution to the unfortunate problems caused by the recent GEMINI outage. We support the approach proposed based on individual User accounts. This ensures that Users which have performed well at scheduling will continue to be recognised appropriately, thereby better facilitating the relevant objective SSC A11.1 (d) the securing of effective competition between relevant shippers.

The alternative - to reconcile all input and output meters - would take a very long time and would likely lead to a number of invoice disputes thereby creating a considerable workload for both individual Users and National Grid.

Yours sincerely

Richard Fairholme (by email)
