Dear Julian,

**Modification Proposal: 0182 Information Provision at LNG Facilities**

Thank you for the opportunity to comment on this Modification Proposal. Scotia Gas Networks supports implementation of this Modification proposal.

This proposal has been raised following implementation of Modification Proposal 104 - Storage information at LNG Importation Facilities which was raised to show aggregate LNG stocks levels at LNG Importation Facilities. Modification Proposal 0182 aims to clarify what should be published if NG NTS does not receive information from one or more Importation Facilities. In Ofgem's decision letter for Modification Proposal 104 they suggested that rather than publish partial information, which could be misleading, 'unknown' levels should be published.

SGN believe that this proposal would add clarity to the UNC by removing any uncertainty from the published aggregate stock levels where not all information is received by NG NTS in a timely manner. As such SGN agree it would be preferable to report a quantity of 'unknown' rather than potentially incomplete misleading information, as LNG stock information may effect Shippers purchasing decisions.

We hope you find these comments helpful.

Yours sincerely

Bali Dohel  
Network Officer
