Dear Tim,

**RE: Modification Proposal 0182 - Information Provision at LNG Importation Facilities**

E.ON UK **supports** implementation of this Proposal.

We believe that this proposal will better facilitate competition between Shippers by removing any uncertainty from the published aggregate stock levels where not all information is received by NG NTS in a timely manner. However, the extent to which this is likely to be a problem clearly cannot yet be assessed as there is currently only one operational LNG importation facility.

Our only concern with this proposal is that there is a risk that the industry may see "unknown" published by NG NTS on many days throughout the year; thereby negating the very point of implementing Modification Proposal 0104. This will, however, be for the industry to review and act accordingly if it becomes a problem.

Yours sincerely

**Richard Fairholme** (by email)
