Dear Julian

UNC Modification 0185VV: Meter Error Notification Process

Statoil (UK) Ltd (STUK) is in support of the above modification proposal and would like to make the following comments.

STUK welcomes the creation of the "Measurement Error Notification Guidelines for NTS and LDZ Metered Offtakes and LDZ to LDZ metered Transfers", and its inclusion in the list of UNC Related Documents, allowing Users to propose changes.

The introduction of more formal guidelines to the Meter Error Notification Process, which has been developed and consulted upon with the industry, will provide additional security for Users that when an error in measurement equipment is discovered, there are guidelines which support the timely and accurate reallocation of misallocated energy.

STUK agrees with the proposed amendments to the OAD to ensure that there are no areas of conflict between the guidelines and the OAD. This will help to ensure that the process remain efficient.

STUK trust that our comments will be given due consideration and should you wish to discuss any aspect of this response further please contact me on the above number.

Yours sincerely

Shelley Rouse.
