Dear Julian

Modification Proposal 0212: Revision of the Rough Storage Connection Agreement

Thank you for the opportunity to comment on the above Modification Proposal. BP is in support of the implementation of this proposal.

BP believes that amending the Rough Storage Connection Agreement to accommodate an increase in the injection rate from 21mcm/d to 26mcm/d will enable shippers to increase the amount of gas they inject into the facility thus increasing the amount of gas that is available during the winter period. This will ensure the economic and efficient use of the pipe line system and will add to the security of supply.

If you wish to discuss further please don't hesitate to contact me on the number above.

Yours sincerely

Andrew Pearce
