Modifications Panel Secretary  
Joint Office of Gas Transporters  
31 Homer Road  
Solihull  
West Midlands B91 3LT

Dear Sirs,

### Modification Proposal 0219 – Liquidity Data

Thank you for inviting representations on the above proposal from Eon.

BOC is pleased to support this proposed modification, which it believes to be a small yet significant step to increase transparency and clarity for users; it will therefore contribute to encouraging market participation, which will in turn tend to reduce market volatility. As a spin-off, the accessibility of information for analysts, journalists and a range of other stakeholders can only serve to enhance the quality of their understanding of this complex market.

BOC does not accept the argument that the information is available already and that the mod is therefore superfluous; the analysis required to turn the detail data into meaningful information is beyond the resources of most consumers and yet it is those very consumers who pay for the gas used.

In the hope that this input is useful.

Yours faithfully

Christopher Webb  
Commercial Manager - Utilities
