Code Modification Proposal No 0219 -Publication of GB Wholesale Gas Market Liquidity Data

Response from Chemical Industries Association

Dear Tim,

The CIA welcomes the opportunity to respond to this modification proposal and is for the implementation of modification 219.

The CIA believes that increased market information and data transparency will help consumers understand the market and therefore aid the ability to make more informed forecasts. It has been noted that the majority of the information proposed is already available to the market. The fact that we were not aware of this information and do not have adequate systems in place to use this information, should highlight the need for an easily accessible source.

We fully support this modification and urge that this data is made available to the market as soon as possible.

Yours,

Gareth Davies
Climate Change and Energy Executive
Chemical Industries Association
