Dear John

Modification Proposal 0222: Amendment of Interconnector UK's Minimum Wobbe Limit

Thank you for the opportunity to comment on the above Modification Proposal. BP is in support of the implementation of this proposal.

BP agrees with the proposer that amending the minimum Wobbe Index in the Network Entry Provisions and the Network Exit Provisions to match that set out in GS(M)R would remove potential barriers to increased gas flows into the GB market. This will ensure the economic and efficient use of the pipe line system and will add to the security of supply.

If you wish to discuss further please don't hesitate to contact me on the number above.

Yours sincerely

Andrew Pearce
