Dear Julian,

**Modification Proposal 0223 –
Provision of day ahead Gas Flow Nomination data at major Aggregate System Entry Points**

Thank you for giving ScottishPower (SP) the opportunity to respond to the above Modification Proposal, which SP supports.

We agree that the proposed publication of this information will potentially allow for more efficient use of the network, without impinging on commercial confidentialities. Equally importantly, by going beyond the strict requirements of the GR1 NW project, this will hopefully encourage moves towards similar increased transparency by other project member and with the EU as a whole.

However we are unclear why the Proposal merely states that the Proposed Implementation Date is “Quarter 2/3 2009”, without giving any further justification and would have preferred something more reasoned and definitive.

Should you have any queries on the above then please do not hesitate to contact me.

Yours sincerely

Gerry Hoggan
