Dear John

Modification Proposal 0236: Amendment to px (TGPP) Limited Network Entry Agreement

Thank you for the opportunity to comment on the above Modification Proposal. BP supports the implementation of this proposal.

BP agrees with the proposer that amending the minimum Wobbe Index and the lower Calorific Value in the Network Entry Provisions to match that set out in GS(M)R would remove potential barriers to encouraging increased gas flows into the GB market.

We also agree with lowering the Delivery Pressure in the Network Entry Provisions to 70 barg to reflect the actual pressure rating of the downstream pipework at the Teesside Entry Point.

This will ensure the economic and efficient use of the pipe line system and could assist the security of supply situation of the GB market.

If you wish to discuss further please don't hesitate to contact me on the number above.

Yours sincerely

Andrew Pearce
