Dear John,

Re: UNC Modification Proposal 0241 - Delaying the implementation of the Ad-hoc application principle of the enduring offtake arrangements

E.ON UK **supports** implementation of this Modification Proposal.

Although it is disappointing that a problem with the new Exit capacity application schedule was not highlighted earlier by National Grid NTS, we believe this Proposal represents a pragmatic solution and should assist with the efficient implementation of the enduring offtake arrangements. We are not aware that any particular Users or class of Users would be disadvantaged by this proposed change.

We have nothing further to add to what has already been written by the proposer in respect of the extent to which the proposal better facilitates the relevant objectives.

Yours sincerely

Richard Fairholme (by email)
