Dear Tim

Response to UNC Modification Proposal 0242 Changes to the window for the submission of Valid Meter Readings

This proposal introduces an extended time period that will allow the shipper more time to carry out validation of meter readings. Often genuine difficulties arise in gaining access to premises in order to obtain actual reads. The advent of smart meters should alleviate this issue, but in the meantime this proposal provides a solution that should result in less estimated reads being submitted by shippers leading to more accurate AQ's.

Consequently costs will be better allocated between market sectors and RbD risk reduced.

In addition more actual reads will produce more accurate consumer billing.

Therefore E.ON UK is in support of Modification Proposal 0242.

Yours sincerely

Brian Durber (by email)
