Dear Bob,

**Re: UNC Modification Proposal 0319V, 0322V, 0323V, 0324V and 0325V: Code Governance Review Modifications**

Thank you for the opportunity to provide representations of the above noted Modification Proposals. Northern Gas Networks (NGN) remains supportive of all of the Code Governance Review Modifications Proposals that have been raised and does not consider that the variations to the Modification Proposals which were presented to the October Modification Panel has caused us to reconsider any aspects of our previous response.

As noted in our previous representation, NGN considers that all the Modification Proposals and subsequent variations have been developed with the full consideration of the wider industry and NGN has welcomed this inclusive approach. NGN believes that these Modification Proposals are consistent with the final proposals of the Code Governance Review and the changes to the GT Licence that resulted from this.

For the avoidance of doubt, NGN supports all of the above Modification Proposals and, on direction to implement from the Authority would expect these to be able to be implemented on 31 December 2010. I hope that these comments are of use and please do not hesitate to contact me should you require any further information relating to this.

Yours sincerely,

Joanna Ferguson  
Network Code Manager
