Dear Bob,

Re: Modification Proposal 0367: Interruptible to Firm – Supply Point Transition

Thank you for providing Scotia Gas Networks with the opportunity to comment on the above Modification Proposal. SGN **supports** implementation of Modification Proposal 0367 and agrees that it meets the self governance criteria and should therefore follow this route for implementation.

The Proposal sets out a series of Supply Point Administration (SPA) steps that Users will be required to carry out to ensure all Interruptible Supply Points are recorded on the Supply Point Register as 'Firm' with effect from 1st October 2011. The Proposal also permits Transporters to take certain actions where those steps are not carried out by the User.

Extent to which implementation of the proposed modification would better facilitate the relevant objectives:

SGN is in agreement with the Proposer that this Modification will help fulfil the relevant objectives:

Standard Special Condition A11.1 (f): promotion of efficiency in the implementation and administration of the Code:

Implementation of this Modification Proposal will ensure that the conversion between interruptible and firm status is carried out in a timely manner and captures any sites that are not reconfirmed by the User.

We hope you find these comments helpful.

Yours sincerely

Colin W. Thomson
