

Variation Request

0389S: Simplification of points of telemetry

Date: 07 February 2012

The Proposer, National Grid Transmission, requests a variation to this modification, pursuant to UNC Modification Rules Section 6.5.1(c) of the UNC.

Reason for Variation

Requirments to clarify the legal text as drieved by the UNC Panel, as well as industry feedback on the solution.

Nature of Variation

This variation request proposes to alter the solution of Modification 0389S, section 3.2, to add the following text:

“This modification also proposes to update the Comments field throughout the tables to provide greater clarity.

The modification does not anticipate any requirement for any DN to install any extra equipment at any existing offtake, or incur any additional costs, as a result of implementation.”

The legal text has also been changed to reflect the varied solution (above) including amendments to the Comments field to show that Site Specific Points of Telemetry are only ever to be provided where the equipment is fitted on site.

This variation also proposes to remove the modification to OAD Annex E1 (c) from the solution, section 3.2.1.

These changes can be seen in the assoicated change-tracked version of the Modification and legal text.
