#### **Do you support or oppose implementation?**

Support

#### **Please summarise (in one paragraph) the key reason(s) for your support/opposition.**

RWEpower welcomes a quarterly service with access to meter read history and meter asset information. It would allow for a thorough and efficient AQ review process assisting in accurate allocation of transportation charges. RWEpower believe that improvements to the AQ review would be beneficial for the supplier as it may reduce Shipper's exposure to the fluctuating costs through RbD.

Improved transparency of AQs across the industry would facilitate a more accurate allocation of energy and transportation charges between relevant Users.

Accurate AQ data held by Xoserve may reduce the volume of challenges from Shippers during AQ review creating process efficiencies, improve industry data quality, improve volume allocation and have a positive impact for consumer billing.
