Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

This modification proposes to remove the current 14 month delay currently applied to reductions in enduring capacity following the completion of the User Commitment. Removing this delay will permit users to reduce their capacity bookings in a timely manner, avoiding unnecessary capacity charges and also allow the capacity released on the transmission system to be utilised by other users. For these reasons SGN are in support of this modification.
