Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

This modification provides the opportunity for larger consumers to take gas supplies on agreed basis in lieu of the completion of up stream reinforcement works. It removes uncertainty as to the availability of localised gas supplies and commits all parties to completion dates with no impact or risk to the security of the supply for the transporter. Large consumer will receive the benefits of earlier connections to the gas network.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

None
