Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

E.ON fully supports implementation of this proposal, which will ensure that Energy Balancing bed debt, which as and when recovered on behalf of the Shipper community, can be returned to the Shippers to which monies are owed. If this Mod is not implemented, significant amounts of money will be held back in the National Grid Neutrality bank account, unable to be returned to Shippers. This is not in the best interests of Shippers and ultimately, consumers.

Are there any new or additional issues that you believe should be recorded in the Modification Report?
