

Representation - Draft Modification Report 0516S
Information provision by large
Customers to aid understanding of site characteristics

Responses invited by: 24 April 2015

Representative:	Colette Baldwin
Organisation:	E.ON
Date of Representation:	23 rd March 2015
Support or oppose implementation?	Support
Relevant Objective:	a) Positive b) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

Having the best information available about a site can only help the networks manage a local emergency. This modification will incentivise certain large customer to ensure they provide accurate contact information to be used in an emergency.

Self-Governance Statement: Please provide your views on the self-governance statement.

We agree that this modification meets the self-governance criteria as it will not have a major impact on consumers or transporters.

Implementation: What lead-time do you wish to see prior to implementation and why?

In order for the process to be in place for the coming gas year, the modification must be approved before the end of May, so implementation as early as possible would be desirable.

Impacts and Costs: What analysis, development and ongoing costs would you face?

We are unlikely to develop any system support for this process, given the number of potential candidates for the service. Equally the costs will be driven by the number of applicants and the degree to which they need assistance, but in our opinion the costs will be low.

Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?

Yes

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No

Please provide below any additional analysis or information to support your representation

N/A
