**Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)**

This modification intends to introduce a report that is issued to Shippers following the removal of a meter from a supply meter point 6 months earlier. The report intends to give Shippers visibility of the meter removal that will allow them to check their systems in advance of the Transporter carrying out a site visit that may result in site visit charges being passed onto the Shipper.

This modification should eliminate unnecessary site visit and industry costs while improving industry data.
