

Representation - Draft Modification Report 0523S

Supply Point Registration - Facilitation of 'faster switching' for Shared Supply Meter Points

Responses invited by: **26 June 2015**

Representative:	Andrew Margan
Organisation:	British Gas Trading
Date of Representation:	26 June 2015
Support or oppose implementation?	Support
Relevant Objective:	d) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

This change supports the code requirement for shared supply points to be switched in line with faster switching obligations.

To run a separate switching process, for the small number of shared supply points is inefficient. We support the switching process being consistent across the industry which will ensure all customers are switched in appropriate timescales.

Therefore we support this modification.

Self-Governance Statement: Please provide your views on the self-governance statement.

We believe this modification meets the self-governance criteria

Implementation: What lead-time do you wish to see prior to implementation and why?

We believe a 1st October 2015 date is achievable.

Impacts and Costs: What analysis, development and ongoing costs would you face?

None identified

Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?

We are satisfied Legal text is appropriate.

Are there any errors or omissions in this Modification Report that you think should be taken into account? Include details of any impacts/costs to your organisation that are directly related to this.

No

Please provide below any additional analysis or information to support your representation

N/A
