

Representation - Draft Modification Report 0523S

Supply Point Registration - Facilitation of 'faster switching' for Shared Supply Meter Points

Responses invited by: **26 June 2015**

Representative:	John Costa
Organisation:	EDF Energy
Date of Representation:	26 June 2015
Support or oppose implementation?	Support/
Relevant Objective:	d) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

This modification is needed to extend the principles implemented through modification UNC 0477 "Supply Point Registration - Facilitation of Faster Switching" to Shared Supply Meter Points (SSMPs). Reducing the timescales for Shipper User transfer of Supply Point ownership at SSMPs to 14 Calendar days will make the arrangements consistent across all supply points and improve the consumer experience. We therefore support its implementation.

Self-Governance Statement: Please provide your views on the self-governance statement.

We agree with the Panel's determination that this is a Self-Governance modification - given the low numbers of relevant Supply Points it is unlikely to have material effect on gas consumers, competition or the operation of pipe-line systems.

Implementation: What lead-time do you wish to see prior to implementation and why?

We agree with the implementation date to be in line with Project Nexus implementation.

Impacts and Costs: What analysis, development and ongoing costs would you face?

N/a

Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?

Yes.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No.

Please provide below any additional analysis or information to support your representation

N/a
