Representative:	Mark Jones
Organisation:	SSE Supply
Date of Representation:	09 September 2016
Support or oppose implementation?	Support
Relevant Objective:	d) Positive f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

As proposer of this modification, SSE is fully supportive of it. Project Nexus is a huge change to the gas settlements system functionality and processes and the delivery of the Project has been fraught with delays and problems. It is highly likely that after it has gone live there will be significant changes to the systems due to fixes, and also further amendments for additional requirements that will lead to changes that will have to be made and implemented by the whole industry. Without a test system there can be no confidence that these new changes will work across all Shippers' systems and the changes could have a huge negative impact on gas settlement allocation and end customers if they were not implemented correctly.

Self-Governance Statement: *Please provide your views on the self-governance statement.*

We are of the opinion that this modification meets the self-governance criteria.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

We would like to see this modification implemented as soon as possible after Project Nexus has gone live and in time to test the RAASP functionality.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

None identified, other than those associated with funding the test system.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No.

Please provide below any additional analysis or information to support your representation
