<b>Representative:</b>	Richard Pomroy
<b>Organisation:</b>	Wales & West Utilities
<b>Date of Representation:</b>	9 <sup>th</sup> September 2016
<b>Support or oppose implementation?</b>	Support
<b>Relevant Objective:</b>	<b>d) i and iii</b> Positive <b>f)</b> Positive

**Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)**

This modification provides a process whereby Users can obtain access to a test environment and will enable better testing of changes to both UK Link systems and Users systems.

**Self-Governance Statement: Please provide your views on the self-governance statement.**

We believe that this modification is suitable for self- governance. It should enable Xoserve and Users to more efficiently implement system changes and thereby should positive affect competition by facilitating industry change.

**Implementation: What lead-time do you wish to see prior to implementation and why?**

This should be implemented after Project Nexus Implementation Date when resources are available.

**Impacts and Costs:** *What analysis, development and ongoing costs would you face?*

From 2016/17 onwards funding of Xoserve will align costs of service provision to the users of services. We believe that only users of this system will be attributed the costs associated with this service. Therefore WWU would not envisage any development or ongoing costs of this service at this time.

**Legal Text:** *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes

**Are there any errors or omissions in this Modification Report that you think should be taken into account?** *Include details of any impacts/costs to your organisation that are directly related to this.*

No

**Please provide below any additional analysis or information to support your representation**

None
