

Representation - Draft Modification Report 0533S

Corrections to Network Entry Provisions in the National Grid NTS-BBL Interconnection Agreement

Responses invited by: **11 May 2015**

Representative:	Mark Lyndon
Organisation:	National Grid NTS
Date of Representation:	11 May 2015
Support or oppose implementation?	Support
Relevant Objective:	f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

As the proposer of this Modification, National Grid NTS fully supports implementation. BBL Company has requested changes to its Interconnection Agreement in respect of its Interconnection Point at Bacton. There are minor drafting errors which appear in the current Network Entry Provisions. Therefore a UNC 'enabling Modification' in accordance with UNC (ref.TPD I 2.2.3 (a)) is required seeking industry approval to make these minor amendments.

The changes required are purely redrafting and do not change the values or parameters of the Gas Entry Conditions or Measurement Provisions.

This Modification if implemented will enable National Grid NTS and BBL to correct minor drafting errors relating to Gas Entry Conditions and Measurement Provisions within the National Grid NTS – BBL Interconnection Agreement. These changes will provide additional clarity for the Interconnection Agreement and consistency with the Network Entry Provisions in other Interconnection Agreements.

Self-Governance Statement: *Please provide your views on the self-governance statement.*

We agree with the Panel's decision that 533S should be a Self-Governance Modification and subject to Self-Governance procedures.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

This Modification has been proposed as Self Governance and therefore could be implemented with immediate effect 16 Business Days after an approval decision by the UNC Modification Panel.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*
