#### Reason for support: Please summarise (in one paragraph) the key reason(s)

In its decision letter for Modifications 0493 and 0500, Ofgem noted a number of clarifications that would enhance the European Interconnection Document which was introduced into the Uniform Network Code by these Modifications. The changes proposed fall under the headings: typographical errors; cross references corrections; duplication removal; timing clarifications; and minor enhancements. The changes are consistent with the principles of good governance and they provide further clarity and help to avoid any potential misunderstanding. This is consistent with the better facilitation of Relevant Objectives: f) “promotion of efficiency in the implementation and administration of the Code”; and g) “compliance with the Regulation and any relevant legally binding decisions of the European Commission and/or the Agency for the Co-operation of Energy Regulators”.

#### Self-Governance Statement: Please provide your views on the self-governance statement.

We support the Modification Panel’s determination of self-governance for this modification.

#### Implementation: What lead-time do you wish to see prior to implementation and why?

There are no implementation issues. In line with self-governance procedures, implementation could be sixteen business days after a Modification Panel decision to implement, subject to no appeal being raised.

#### Impacts and Costs: What analysis, development and ongoing costs would you face?
