

Representation - Draft Modification Report 0576

Generation of an estimated Meter Reading at the Code Cut Off Date in the absence of an actual Meter Reading

Responses invited by: **5pm 07 July 2016**

To: enquiries@gasgovernance.co.uk

Representative:	Mark Jones
Organisation:	SSE Supply
Date of Representation:	07 July 2016
Support or oppose implementation?	Support
Relevant Objective:	d) Positive f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

Where a meter reading has not been received by the Transporters' Agent for seven years or more for a Supply Meter Point, there is a need for an estimated meter reading to be generated in order for the relevant Supply Meter Point to reconcile upon receipt of a subsequent meter reading. This is necessary in order to ensure that gas settlement is as accurate as possible and that all Supply Meter Points are able to be reconciled when future readings are loaded.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

This modification should be implemented prior to the Project Nexus go live in order to allow estimated readings to be generated.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

None identified over and above those required for Project Nexus.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No.

Please provide below any additional analysis or information to support your representation
