

Representation - Draft Modification Report 0589S

Inclusion of CSEP Meter Supply Points within NDM Sampling Arrangements

Responses invited by: **5pm on 09 September 2016**

To: enquiries@gasgovernance.co.uk

Representative:	Fraser Mathieson
Organisation:	SGN
Date of Representation:	6 th September 2016
Support or oppose implementation?	Support
Relevant Objective:	d) Positive f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

SGN supports this modification and considers that it appropriately removes the restriction placed by Modification 0440 on the use of CSEP Supply Meter Points in NDM Sampling. We believe this will benefit sampling arrangements by ensuring the continued availability of a valid and representative sample pool for use in the development of NDM Demand Models and EUC development which in turn should further accurate energy and cost allocation.

Self-Governance Statement: Please provide your views on the self-governance statement.

SGN supports the self-governance status of this modification.

Implementation: What lead-time do you wish to see prior to implementation and why?

Until CSEP Supply Meter Points come within the purview of the UNC they cannot be utilised in NDM Demand Models or EUC development and as such implementation on, or soon after, Project Nexus Implementation Date is preferred.

Impacts and Costs: What analysis, development and ongoing costs would you face?

None identified.

Legal Text: Are you satisfied that the legal text will deliver the intent of the Solution?

Yes.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

N/A

Please provide below any additional analysis or information to support your representation

N/A
