<b>Representative:</b>	Chris Hooper
<b>Organisation:</b>	Contract Natural Gas
<b>Date of Representation:</b>	10/12/2020
<b>Support or oppose implementation?</b>	Support
<b>Relevant Objective:</b>	d) Positive

#### Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

The modification, if implemented, would provide further clarity to Shippers around future use of the AQ amendment process as per TPD G2.3.21©.

#### Implementation: *What lead-time do you wish to see prior to implementation and why?*

As this is simply a clarificatory modification with no required system changes, we have no concerns regarding an expedited implementation date.

#### Impacts and Costs: *What analysis, development and ongoing costs would you face?*

We do not envisage any external / internal costs related to the implementation of this change.

#### Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

We believe the legal text provided should deliver the Solution set out in the modification.

#### Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

n/a

**Please provide below any additional analysis or information to support your representation**

Should this change be implemented, we believe that it would deliver substantial elements of the decoupled UNC Modification 0746 (Formerly 0736A). We would therefore expect 0746 would either be withdrawn or reviewed and amended to remove elements already resolved by the implementation of 0736.
