

## 0708S Legal Text Commentary

The legal texts provided will re-order Section G of the UNC Transportation Principal Document (TPD) to align with the Faster Switching Text produced by Dentons. As part of the reordering of Section G, some sections have been moved into other sections of code.

A new Section 8 (Interruption) and a new Annex B-3 (DM Supply Point Capacity and Offtake) will be inserted into TPD B (System Capacity). New TPD B8 can be seen in DOC\_1 and new Annex B-3 can be seen in DOC\_2.

Current TPD G (Supply Points) will be deleted and replaced with a new, re-ordered version which contains updated cross-references (this includes movement of some sections into new Annexes and the amendment of some existing Annexes as per DOCS 1, 2 & 4). The new Section G can be seen in DOC\_3.

A new paragraph 1.9 (Reduction of Offtake at Firm Supply Points) will be inserted into TPD J (Exit Requirements), shifting the remaining numbering down by one. This can be seen in DOC\_4.

Cross-reference updates will also be made in relevant sections of TPD, IGTAD and General Terms. These can be seen in DOC\_5.

During the Faster Switching Text work, Dentons discovered a number of existing UNC cross-references which were incorrect and corrected these in their Faster Switching Text; therefore, these have also been included in the 0708S text to ensure consistency. Please see the below table which outlines these corrections:
