

# Identifying negative Shipper behaviour: Read rejections

V1

Shelley Rouse

**Gemserve**

# REJECTION FOR TOLERANCE BREACH

- Validation of submitted meter reads ensures that quality data is entered into central systems
- Meter reads submitted by a Shipper can be rejected for a number of reasons, some of which may be resolved, some may not and should be rejected
- Our analysis will focus on meter reads rejected for breaching 'upper outer tolerance', or 'Market Breaking reads'
  - One way to resolve rejected meter reads for upper tolerance breach is to increase the AQ of a meter, if appropriate (by AQ correction), allowing the meter reads to pass tolerance checks.
    - By not correcting AQs, reads will continue to reject (which may show in the data)
    - By not submitting the reads at all AQs remain low but meter read performance will be impacted

| Shipper Name | Reads where logic check* failed as a % of submitted readings | Reads where logic check* failed as a % of submitted readings-MRE01030 | Reads where logic check* failed as a % of submitted readings-MRE01026 | Reads where logic check* failed as a % of submitted readings-MRE01027 | Reads where logic check* failed as a % of submitted readings-MRE01028 | Reads where logic check* failed as a % of submitted readings-MRE01029 |
|--------------|--|---|---|---|---|---|

# READ REJECTION FOR REASON CODE 1027

---

- What are we looking for?
  - **Consistent, above average level of read rejections**
    - Indicating that Shippers were continually submitting reads that are out of tolerance, potentially for the same meters
  - **Steadily increasing level of read rejections**
    - Indicating poor portfolio health, Shippers continually submitting reads that are out of tolerance, for increasing number of meters
  - **Negative impact on meter read performance and/or a large number of meters that have not had a meter read for longer than 1 year.**

# READ REJECTION FOR REASON CODE 1027: PC3

- What are we seeing?
  1. Consistently low levels of read rejections
  2. No Shipper has increasing levels of read rejections
  3. Where higher than average levels are seen, they quickly return to 'normal'

| PC3     | FEB    | MAR    | APR    | MAY   | JUN   | JUL   | AUG   | SEPT  | OCT   |
|---------|--------|--------|--------|-------|-------|-------|-------|-------|-------|
| Shipper | 6.10%  | 0.40%  | 0.20%  | 0.14% | 0.20% | 0.23% | 0.20% | 0.22% | 0.18% |
| Shipper | 0.03%  | 0.02%  | 0.01%  | 0.00% | 0.45% | 0.55% | 0.64% | 0.56% | 0.01% |

Rejections not steadily increasing

Consistently low level of rejections

Higher than average levels quickly return to 'normal'

Actual extract from PARR 2A.6 reports, for reason code 1027

# PC3 CASE STUDY

Improvements seen, but high level of manual intervention

|                  | FEB    | MAR    | APR    | MAY   | JUN    | JUL    | AUG   | SEPT  |
|------------------|--------|--------|--------|-------|--------|--------|-------|-------|
| Read performance | 2.63%  | 14.07% | 10.41% | 7.51% | 15.00% | 13.14% | 4.39% | 1.96% |
| PC3 rejections   | 25.00% | 9.76%  | 15.66% | 4.35% | 6.67%  | 1.89%  | 8.70% | -     |

Read performance targeting underway

- Performance improvement plan identifies that system upgrades underway.
- Read performance increasing, but rejections remain high.
- PAFA and CAMs communication with Shipper throughout

Shipper confirms difficulties operating within the class and intention to remove all sites

By end of month, only one site remaining

# REJECTED READS V METER READ PERFORMANCE

- Rejected read levels are as expected. Are we seeing any other indicators of negative behaviours?
  - Decreasing levels of meter read performance

High level of rejections July, with high read submission. Reduction of rejected reads in August with reduced read submission, back to 'normal' in September.

|              |       | JUNE            |           | JULY            |           | AUG             |           | SEPT            |           | OCT             |           |
