

EUC09 Sites not in Class 1

PAC Update June 2020

Recap

- UIG Task Force identified sites with AQs over the Class 1 threshold that are still in Class 3 or 4 (Issue 3.2.1)
- Obligations in UNC G1.6.15 – updated by UNC Mod 0690 – **RAG status reflects the new rules**
- These sites should now be re-confirmed as Class 1 by the Shipper after **3 consecutive AQ calculations above the threshold, or after 12 months if every calculated AQ is above the threshold**
- These sites could be contributing to daily UIG if their usage pattern is very different to the EUC09B NDM profile
- Raised at UNC UIG Workgroup in January 2019 – recommended engagement by Xoserve and monitoring at PAC – last update provided at March 2020 PAC

Observations

- Now eight Shippers with Red sites this month (up from seven in March)
- 16 of the Red sites had a meter reading loaded in May – good news for reconciliation and AQ accuracy – but 7 had not had an AQ calc in the last three months
- Of the 22 Red sites this month, 14 were present in the last update, 8 are new
