

Background

UNC Modification 0690S (Reduce qualifying period for Class 1 – implemented with effect from 25 March 2020) amended the UNC Section G1.6.15 rules for eligibility for Class 1. The Final Modification Report (FMR) states:

“This Modification also seeks to introduce an additional report to Performance Assurance Committee (and a corresponding anonymised report) in the Performance Assurance Report Register of meter points which have met the qualifying period requirement but are not in Class 1, with details of the current rolling AQ and the number of AQ calculations above the threshold”

However the 0690s FMR does not specify the format of the new PARR report (although it lists available data items from an internal CDSP Change Request) .

Proposed Addition to the PARR

The latest draft of Modification 0691S includes two proposed PARR reports: a report of sites converted to Class 1, split between Shipper and CDSP converted; and a report of Sites above the Class 1 Threshold, not yet in Class 1, split between Class 2 and Class 3 or 4 (combined). The second report would replace the current Red/Amber/Green which Xoserve presents to PAC using separate anonymisation.

See Appendix below for format of report.

Proposal to PAC: adopt Reports 2A.y (Industry Peer Comparison View) and 2B.y (Performance Assurance Committee View) into the PARR (regardless of the outcome of 0691S) to provide enhanced monitoring of Class 1-eligible sites.

APPENDIX: FORMAT OF REPORTS**Schedule 2B.y – Performance Assurance Committee View**

Report Title	Sites above the Class 1 threshold which are not in Class 1
Report Reference	2B.y (reference to be determined following implementation of UNC Modification 691)
Report Purpose	To provide an overview of sites which are approaching or have reached the qualifying period for re-confirmation as Class 1.
Expected Interpretation of the report results	The aim is to understand whether Shippers are meeting their obligations to monitor and manage their very large sites and initiate re-confirmation to PC1 in a timely manner. The report should identify performance across all market participants.
Report Structure (actual report headings & description of each heading)	Monthly non-cumulative report Shipper Shortcode Current Product Class grouped as PC2 separated and PC3/4 together Count of supply points split between number of qualifying months met and not yet met Total AQ of supply points split between number of qualifying months met and not yet met Industry Totals split between number of qualifying months met and not yet met
Data inputs to the report	SSC Product Class Rolling AQ Number of months/calculations since the AQ first crossed the threshold
Number rounding convention	Whole numbers
History (e.g. report builds month on month)	A Rolling 12 month view, provided monthly
Rules governing treatment of data inputs (actual formula/specification to prepare the report)	Sites are counted from the month that the effective AQ first crossed the Class 1 threshold until they are re-confirmed as Class 1. Sites are included if they are in the Shipper's ownership at the end of reporting month, even if the Shipper has only gained them during the reporting month in question. The report is prepared as soon as possible after the end of the calendar month
Frequency of the report	Monthly
Sort criteria (alphabetical ascending etc.)	Shipper shortcode Identifier alphabetically
History/background	Requirement introduced to support UNC Modification 0691 obligations
Additional comments	
Estimated development costs	
Estimated ongoing costs	

Count of Supply Points above the Class 1 threshold which are not in Class 1						
	Month x		Month x + 1		etc	
AQ above 58.6m	Qualifying period not met	Qualifying period met	Qualifying period not met	Qualifying period met	Qualifying period not met	Qualifying period met
Shipper A						
PC2	0	0	0	0	0	0
PC3/4	0	0	0	0	0	0
Shipper B						
PC2	0	0	0	0	0	0
PC3/4	0	0	0	0	0	0
etc						
Total	0	0	0	0	0	0
PC2	0	0	0	0	0	0
PC3/4	0	0	0	0	0	0

Total (Rolling) AQ of Supply Points above the Class 1 threshold which are not in Class 1 (kWh)						
	Month x		Month x + 1		etc	
AQ above 58.6m	Qualifying period not met	Qualifying period met	Qualifying period not met	Qualifying period met	Qualifying period not met	Qualifying period met
Shipper A						
PC2	0,000	0,000	0,000	0,000	0,000	0,000
PC3/4	0,000	0,000	0,000	0,000	0,000	0,000
Shipper B						
PC2	0,000	0,000	0,000	0,000	0,000	0,000
PC3/4	0,000	0,000	0,000	0,000	0,000	0,000
etc						
Total	0,000	0,000	0,000	0,000	0,000	0,000
