

# UNC 0XXX:

Aligning Capacity booking under the UNC and arrangements set out in relevant NExAs

Proposer: Tracey Saunders (Northern Gas Networks)

Panel Date: 15<sup>th</sup> August 2019

# Why change?

- Current lack of visibility where a NExA exists
- No current process to link the maximum Capacity quoted in the NExA with the maximum allowed capacity in the system
- No current process to link any forward NExA dates to the maximum capacity allowed

# Options

- To introduce visibility where a NExA exists (for all classes)
- To link value in NExA to maximum system offtake value
- To link any 'future' increase/decrease requests to the requested effective date

# Solution

- To introduce visibility where a NExA exists (for all classes) by creating a 'flag' in DES
- To link value in NExA to cap Maximum Offtake to that PMSOQ is capped at this value
- To introduce an effective from date where a NExA has a future dated increased Maximum Offtake

# Recommended Steps

The Proposer recommends that this modification should be:

- Treated as an alternative to Modification 0696
  - Differing in 3 ways
    - It is not retrospective
    - It includes all classes
    - Caps capacity to maximum rate in NExA
- Treated as Authority Direction
- Sent to Distribution Workgroup for assessment to develop the modification for 4 months
