CMS Rebuild ChMC Update

January 2024

Progress Update

- The build for V1.7 which contains the two new processes for XRN5604 and XRN5605 (Known Meter Issue (KMI) and Shipper Agreed Reads (SAR) has progressed to plan and we are entering the final stages of testing in readiness for launch on 24 February.

- Version 1.8 containing the Must Reads (MUR) process will be closely followed in March

- Our customer engagement activities for 2024 Q1 can be found below, please note if you are already on the Customer Focus distribution list you will not need to re-register for any future Focus Groups :

Now | **Then** | **Later**

Roadmap Commentary:

- There is a possibility that DMQ may be ready for launching post V1.8. This will be discussed in the Customer Focus Groups before changing the delivery dates.

- We are still firming up targeted dates for V1.9 and V1.10, they are likely to be in April. However, this will be confirmed in Februarys ChMC.
