AUGE Progress Update

August 2019

Tony Perchard & Clive Whitehand

30 August 2019

Progress Summary

- Overall Status – ON TARGET
 - Data Request Status published on JoT
 - Prioritised Topic List published on JoT
 - Data Provision & Analysis ongoing
 - Initial Results on Meter Location included

- Risks
 - Data from gas temperature study may not be available in time for inclusion in methodology

Analysis Progress Update

- Theft Analysis (Topic 8)
 - Awaiting TRAS data
- Use of Static Correction Factors (Topic 25)
 - Awaiting procurement of gas temperature study
- Permanent UIG Level (Topic 33)
 - Monitoring of UIG & Reconciliation ongoing
- Meter Exchange (Topic 35)
 - Awaiting data

Analysis Progress Update

- Discrepancies between converted & unconverted meter reads (Topic 37)
 - Investigation ongoing
- Accuracy of NDM Algorithm (Topic 39)
 - Monitoring changes to assess impact
- More detailed analysis of meter locations (Topic 58)
 - Analysis included in this update

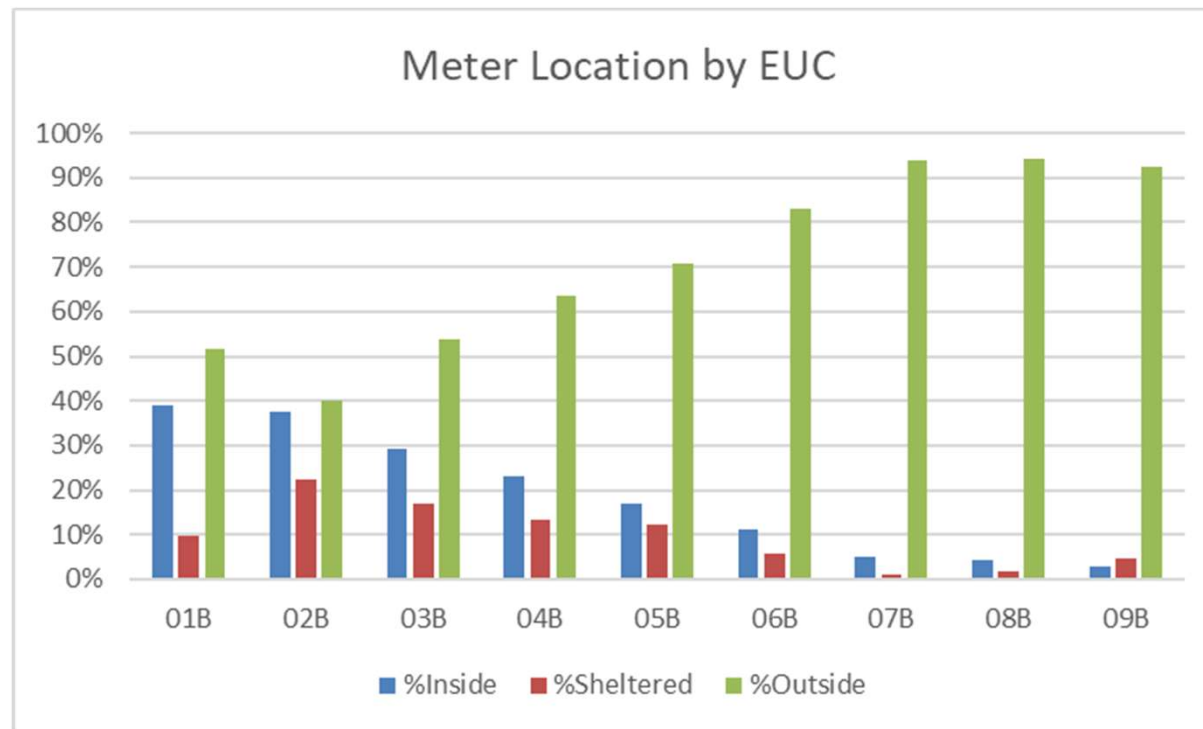

New Topics

- New topics awaiting data for initial impact analysis
 - Incorrect customer information (Topic 54)
 - Skype meeting arranged with SGN to discuss points raised in their presentation
 - Review of CSEP methodology (Topic 59)
 - Use of temperature data from volume converters (Topic 60)
 - Use of corrected vs uncorrected meter reads (Topic 61)
 - Analysis started

- New topic on hold
 - Creation of new EUCs (Topic 55)

Meter Location Results

- Meter Location by EUC
 - Meters are much more likely to be indoors or in a sheltered location (e.g. garage) for lower EUCs
 - Suggests use of EUC specific gas temperatures may be appropriate

Plan for September

- Continue to support joint Theft workgroup
- Complete initial analysis for new topics raised
- Present progress at Early Engagement meeting (30 Sep)
- Assess & Prioritise any new topics raised
 - New topics can be raised at any time via the AUGE mailbox
 - AUGE.software@dnvgl.com
