

Agenda Items Summary

UIG Sprint Recommendations (For Review)

- UIG Workgroup on 28th January 2019 recommended that DESC review the UIG Taskforce Sprint Findings relating to the use of additional weather data items in the CWV formula. This agenda item offers DESC an opportunity to review these and comment

See these on link below - Scroll down to Ref 13.2.2 and 13.2.5 under “Findings and Recommendations”

[UIG Sprint Recommendations](#)

Algorithm Performance – Reconciliation Analysis (For Information)

- Provides an update on the latest position with using reconciliations as a method to assessing algorithm performance and will mainly focus on when the UIG Taskforce will be in a position to share its results

Modelling Approach – Spring 2019 (Decision)

- Provides an updated view of the approach to deriving EUCs and their demand models for use in Gas Year 2019/20. The presentation reflects on the comments received and seeks to gain approval of the approach in order that the modelling process can commence.

Seasonal Normal Review Update (For Review)

- During 2019, in line with its obligations in Section H of the UNC, DESC will be reviewing the formula for the Composite Weather Variable (CWV) and the basis for calculating the Seasonal Normal equivalent of the CWV. This update sets out the proposed approach for how DESC and TWG will decide whether the existing CWV formula should be revised and seeks views on it.
