

## DSC Contract Management Committee

Action Update: 0208

# The ask from CoMC

At February 2024 CoMC, IGT parties requested to discuss 'Asset Updates' as an item of any other business with representatives

The topic had been discussed and presented in IGT and Shipper Constituency meetings in early 2024, where IGTs had been advised to bring this to the attention of CoMC to discuss further

Following a brief discussion in February CoMC, an action was agreed to be taken away and progressed ahead of presenting to March 2024 CoMC

The details of this action as captured were as follows;  
*'PO & CG to discuss the scope and potential Solution options in preparation for the Asset Updates item in the next meeting'*

# Asset Updates – In flight development activities

## DDP – Market Domain Data Analysis

- Exercise being performed between March – April 2024
- Dashboards to reflect MDD portfolio comparison for IGT customers
- Following data items included within the comparison
- Repeat of an annual exercise performed last year
- Feasible that this exercise could be repeated or performed as a scheduled activity if supported by IGT customers

## UK Link RGMA Analysis and Validation review

- Confirmed that UK Link validation has been performed in line with agreed specification
- Assessment being carried out to seek how validations could be enhanced to improve MDD alignment
- Outputs of assessment to be presented back to customers and potential for change to be raised if supported by parties

## XRN5473 – Meter Asset Data Proactive Management Service

- Change raised by Xoserve to assess options to utilize data available to CDSP to proactively support Shippers and other parties
- Change has remained on hold whilst regulatory and customer raised changes have taken priority in BP23
- Agreed that change should begin to assess customer requirements and use cases
- Anticipated that this can begin in April 2024 – in collaboration with customers via DSG and Constituency meetings

# Summary of next steps

- Await outputs of DDP – MDD Analysis to establish whether further use cases exist to support IGT portfolio management using visualisation solution
  - May 2024 – with information being used to aid General Change Investment Planning for BP25
- Await conclusions of detailed UK Link analysis on existing validation logic to establish what solution could be progressed to improve asset validation across existing UK Link services
  - Output available approx. May 2024 ahead of formal change being presented to customers
- In parallel to those activities above, progress with customer requirements relating to potential use cases of Meter Asset Data Proactive Management Service
  - To commence April 2024 – with this anticipated to be iterative development exercise requiring customer input throughout BP24
