Aged Population Review

Background

- Previous indication of desire to review the aged population
- Intention to proactively stimulate discussion/idea's
  - *Possible future agenda topic to brainstorm other possibilities*
  - *Target current static volumes*
- Initiated with review of individual pots
- Particular interest in high volumes & age of MPRN

Process

- We opted to initially focus on the **Legitimately Unregistered** population
  - *Largest population / largest amount of aged sites*

- Sought to establish/ring-fence sites for potential closure
  - *Removed MPRN's with a status of CA/CL*
  - *Categorised MPRN's by age*
  - *Identified all MPRN's with a Meter attached*
  - *Cross-referenced through supplementary data report (check for MSN)*
  - *Searched for other indicators suggesting Network/Shipper activity*

Findings / Volumes

- The total population analysed - 33,973 sites
- Of which 24,775 were aged 10years or older*
- Where 10+ years & no evidence of activity** - 24,098 sites
- The entire population only indicated 3% activity

Age	Total sites	Total with activity
New - 5 Years	375	10
5 - 10 Years	8,823	72
10 + Years	24,775	677

*** Based upon MPRN creation date**
**** Meter attached / Confirmation attempt / notification of activity**

Proposals

- Is there appetite to focus on this dataset?
  - *Looking for Industry consensus to proceed*
- Discuss possible outcomes…
  - *Close sites / Remove from population*
  - *Undertake closer analysis on specific elements*
  - *Other thoughts & idea's*
- Considering the benefits & associated Industry impacts

Next steps

- All attendees to review these findings
  - *Feedback before next S&UWG (if possible)*
- Request where possible for DN's to sample check a selection of sites
  - *Desk top / Site Visit checks to ascertain physical status?*
- Workgroup to agree consensus for next course of action
- Based upon findings consider similar reviews of other S&U pots
