“Update to AQ Correction Processes”

Action 0208

View of PARR Reports

Action Overview

- Xoserve (FC) to provide a view of the AQ Corrections PAC Report for the September meeting
- September meeting was deferred
-

Background

- Performance Assurance Report Register (PARR) is currently a UNC Related Document
- All documents can be found on Joint Office website:
<https://www.gasgovernance.co.uk/tpddocs>
- Reports are produced by CDSP each month and published by PAFA on their secure portal
- Register consists of 2 suites of reports – anonymised for any Shipper/GT party to view – unanonymised for PAC Members only
- PARR definitions will become part of the Performance Assurance Framework Document at implementation of UNC Mod 0674V (on November 1st) – no planned changes to report definitions as part of the Mod

AQ Corrections Reporting

- Separate table for each of the four available Reason Codes:
 - Confirmed Theft
 - Change in Consumer Plant
 - Commencement of New Business
 - Tolerance Change
- Anonymised and Unanonymised reports both show 12 months of actual counts of corrections – example below is the anonymised version

Report Example:

Shipper use of AQ Correction	Reason Code			
	Jan	Feb	Mar	[X]
A	0	0	0	0
B	0	0	0	0
C	0	0	0	0
Industry Total	0	0	0	0

The logo for 'xserve' is centered within a stylized house outline. The house has a white background with a light blue diagonal line pattern. The house's outline is composed of a grey roof and a grey base. The word 'xserve' is written in a blue, sans-serif font. The 'x' is a dark blue, while the 'serve' is a lighter blue. The 'x' is composed of two overlapping shapes that resemble arrows pointing towards each other. The house's window area is divided into four vertical panes by thin grey lines.
