

UNC Modification 0832S Legal Text and Commentary

Text Commentary

This Modification seeks to provide additional flexibility to change the percentage of the Reserve Price used to determine the NTS large price step when it is deemed appropriate to do so. Updates to UNC TPD Section Y are required to implement the changes proposed within this Modification.

Changes to paragraph 2.9.2 a) will allow for National Grid NTS to amend the percentage of Reserve Price used to determine the NTS Large Price Step when it is deemed appropriate to do so.

The addition of text at the end of paragraph 2.9.2 explains that NGG will provide transparency to market participants by providing supporting information should it deviate from the default arrangements.
